

# **Web Developer (m/f/d), (English/German)**

## **Part-Time | Full-Time | Freelancer | Remote Possible**

**Minimum of 20h per week, full-time preferred, starting July 2020**

**We have an exciting opportunity for an experienced web developer in a fast-growing startup that aims to change urban mobility.**

**This is an exciting role for experienced web developers looking for a fast-paced work environment, flat hierarchy and room for personal growth. If you are a self-starter, need little to no supervision, are comfortable working in teams but also independently, already have a great set of skills and techniques to apply in various projects in a startup environment - This may be a good fit for you!**

### **Job Overview**

This web developer or web designer role offers numerous opportunities to apply and deepen existing technical proficiency and business acumen as it relates to application development, design and scaling. The Web Developer will work as a peer to other experienced software engineers, be introduced to technologies used by our engineers and encouraged to bring in his or her own point of view to also challenge the status quo. The role is located in Nuremberg (ZOLLHOF) or Bamberg (ERBA). This position is also offered as a (partially) remote opportunity; however, you will be responsible for ensuring you have the proper equipment needed to perform the role and the option to meet us at either our Nuremberg or Bamberg office as needed. (Minimum requirements to work remotely are a laptop or desktop computer, a reliable high-speed internet connection, a cellphone with internet connection and email client. Any software required will be provided by us). The onboarding is required to be on-site.

### **What you'll do:**

- You'll take on the lead to design, build, test and implement functional software modules/elements of our Mobility Operating System, M-OS
- Collaborate with your teammates to create strategy, come up with new ideas and provide insight and expertise for our projects
- You'll build custom web-apps and adjust existing software modules to the specific needs of our customers (cities)
- You'll build click-dummies and other prototypes and discuss them with our project leads or customers and modify them as needed
- You'll work in an interdisciplinary team with many touch points to other business functions/units
- You'll follow pre-established coding standards and other guidelines
- You'll perform related tasks as assigned

**Minimum job requirements:**

- Comprehensive frontend development experience and working knowledge in some of the following: (html, JavaScript, TypeScript, React, Angular, or similar)
- Basic knowledge or interest in adjacent areas like backend and mobile app development
- Experience with agile development

**Nice to have:**

- Experience and working knowledge in backend development and programming languages/frameworks such as PHP, Laravel, Python, C#
- Experience and working knowledge in App-development and programming languages such as Flutter, React Native, Progressive Web App
- Native app development (kotlin – Android, objective C – iOS)
- Experience and working knowledge of database scripting languages and technologies such as SQL, MySQL, Postgres with PostGIS
- Working knowledge of Content Management Systems (CMS, eCMS, DocMS, etc.) such as WordPress
- Familiar with source code versioning tools such as Git, SVN, etc.
- Hosting & domain management experience
- Administration of Linux servers
- Experience integrating APIs

**Skills:**

- Keen attention to detail
- Highly self-motivated and self-directed
- Analytical and problem-solving abilities
- Willingness to take on responsibility
- Fast learner
- Curiosity and openness
- Agile development

**Education and Training Requirements:**

- Bachelors or master's degree in Computer Science, Information Systems or similar with prior work experience of at least 1 to 2 years
- Associates or professional degree with relevant work experience (5-10 years)
- Enrolled in a master's program with prior work experience of least 1-2 years

**Benefits:**

- Flexible work schedule
- Payment and leave time depending on the form of employment
- Great growth potential/options to develop into leading roles
- Stock options possible
