

## **Junior Web Developer (m/f/d), (English/German) Freelancer | Remote Possible**

**Minimum of 10h-20h per week, with the option to go full-time, starting July 2020**

**We have an exciting opportunity for a freelancer web developer in a fast-growing startup that aims to change the way we move around.**

**This is an exciting role to jump-start your career in software development. If you are passionate about change, comfortable working in teams and curious about learning fundamental skills and techniques to excel in a startup and a career in software engineering - This may be a good fit for you!**

### **Job Overview**

This entry-level web developer or designer role offers numerous opportunities to build on existing technical proficiency and business acumen as it relates to application development and design. The Jr. Web Developer will be guided by experienced software engineers and introduced to technologies used by business units of all sizes that utilize software in their day-to-day operations. This position is offered as a remote opportunity; however, you will be responsible for ensuring you have the proper equipment needed to perform the role and the option to meet us at either our Nuremberg or Bamberg office as needed. (Minimum requirements to work remotely are a laptop or desktop computer, a reliable high-speed internet connection, a cellphone with internet connection and email client. Any software required will be provided by us). The onboarding is required to be on-site.

### **What you'll do:**

- You'll independently build, test and implement functional software modules/elements of our Mobility Operating System, M-OS
- You'll independently build custom web-apps and adjust existing software modules to the specific needs of our customers (cities)
- You'll build click-dummies and other prototypes and discuss them with our project leads or customers and modify them as needed
- You'll work in an interdisciplinary team with many touch points to other business functions/units
- You'll get the chance come up with own ideas and contribute to our strategy
- You'll follow pre-established coding standards and other guidelines
- You'll perform related tasks as assigned

**Minimum job requirements:**

- Basic frontend or development experience and working knowledge in HTML and ReactJS
- Basic knowledge or interest in adjacent areas like backend and mobile app development (Java Spring Boot, Flutter)

**Nice to have:**

- Experience and working knowledge in backend development and programming framework Java Spring Boot
- Experience and working knowledge in App-development and programming languages such as Flutter and ReactJS
- Experience and working knowledge of database scripting languages and technologies
- Familiar with source code versioning tool Git
- Administration of Linux servers
- Experience integrating APIs

**Skills:**

- Keen attention to detail
- Highly self-motivated and self-directed
- Analytical and problem-solving abilities
- Fast learner
- Curiosity and openness
- Agile development

**Education and Training Requirements:**

- Bachelors or master's degree in Computer Science, Information Systems or similar, no prior work experience required but of advantage
- Or another professional degree with relevant work experience (2-5 years)
- Or Enrolled in a master's program or a graduate student of a bachelor's program in one of the fields mentioned above

**Benefits:**

- Flexible work schedule
- Great growth potential
- Opportunity to convert into a full time employee
